

# Lesson 4-8 → Introduction to Systems of Equation Scenarios

A private beach charges for parking by giving customers a choice

→ Summer Pass for \$80

→ Day Pass for \$10 each day after \$30 registration fee

Summer Pass (\$)	Days	Day Pass (\$)
80	0	30
80	1	40
80	2	50
80	3	60
80	4	70
80	5	80
80	6	90

Summer Pass

$$y = 80$$

Day Pass

$$y = 10x + 30$$
